Annual Scientific Meeting 2017

*It is with great pleasure that we welcome you to the next annual scientific meeting to be held on **25th & 26th March 2017**, themed '**Navigating Medicolegal Minefields**'. Medical practice and indeed patient expectations continually change over time. The advances in medical care has come at a cost - which has to be borne by the patient in some form or other. This, coupled with the fact that patients are becoming more well-informed of their own conditions creates an environment of greater expectation and anger or disappointment if things do not go as they expect it to. As a result, complaints and litigation is undoubtedly on the rise so we as doctors must understand it and the processes involved so that we can continue providing the high level of care we wish without practising in fear. After all, as a profession, we have always had the best interest of the patient at heart. This will never change.*
